

LAW FIRMS AND EMAIL ARCHIVING

RazorSafe is the ideal emailing archiving solution for law firms. It addresses the many challenges faced by the legal industry including compliance, legal discovery, email server overload and disaster prevention management and recovery.

THE CHALLENGES

Emails and electronic documents are the primary method attorneys and legal personal communicate. This poses many challenges such as effective searches, locks on emails to prevent deletion and compliance restrictions. Large mailboxes challenge mail server speeds and hamper disaster recovery and prevention.

THE SOLUTION

RazorSafe attacks all these challenges head-on and satisfies the needs of all the stake holders. Each feature of RazorSafe was designed by partnering with the customers. We don't just keep the customer in mind; we ask the customer.

RazorSafe safely and securely protects and archives your emails, contacts and calendar items. All email data is de-duplicated saving up to 75% on disk usage. RazorSafe is scalable solution that matches the needs of a law firm.

Intradyn offers a wide range of e-mail active-archiving appliances that install in minutes, are non-disruptive to a company's IT infrastructure, requires no software to be loaded onto the email server and has no "per-user" fees. RazorSafe works with Microsoft Exchange, Lotus Notes, Novell GroupWise, or virtually any other IMAP or POP3 email system (including multiple email servers simultaneously).

RAZORSAFE

RazorSafe provides **Tags and legal hold** features. Tags can be used to group emails. A legal hold can be placed on emails so they can never be deleted. Emails that meet user specified criteria can be automatically (**automated searches**) Tagged or place on legal hold.

RazorSafe provide a **robust powerful search engine**. Searches are user friendly and extremely flexible. Each action is tracked giving a detailed chain of custody for any email. Legal hold, multiple tags, and comments may be placed on an email to further enhance searches.

RazorSafe provides a flexible work flow which can work with your needs. Tools are provided to help with compliance and regulatory issues.

Now IT managers don't need to choose between larger mail boxes and an optimized email server. RazorSafe provides an **optimized email server** by automatically managing data and safely removing emails. Users can use Outlook* or Lotus Notes** plug-ins, or a web front-end to search and access emails. Users have a virtually unlimited mailbox without overloading the IT infrastructure.

RazorSafe not only provides email archiving it provides peace of mind.
