

Sourcetek Systems is an enterprise data protection and primary storage solutions solutions integrator. We provide high availability, high performance storage solutions for the UNIX, Windows and Linux markets. Sourcetek represents the leading manufacturers of tape- and disk-based backup solutions, storage area networking (IP and FC) solutions, Network Attached Storage Solutions (NAS), Fibre Channel and SCSI RAID (DAS) and non-RAID storage products.

Our trained staff has decades of experience providing storage products and we understand that the foundation of your company is built on its INFORMATION. A critical asset that must be STORED, MANAGED, PROTECTED and AVAILABLE upon demand.

Sourcetek acts as your resource management team and helps to identify, evaluate, and deliver cost-correct solutions --- tape drives, automated tape robotic libraries, tape virtualization arrays, disk storage, RAID, storage management enterprise software, consulting and support services.

We are committed to maintaining long-term business relationships--not short term sales. We look forward to hearing from you!
